

João Cunha

Frontend Developer

I am an eager individual looking to improve my skills and contribute within a team environment. I have acquired a good grasp of the web development fundamentals and have a passion for developing software applications.

PROJECTS

Wellington Limousine -

<https://wellington-limousine.pages.dev/>

- Worked with a [local freelance client](#) using **(React, TypeScript, Tailwind)**
 - Utilized Swiper.js library for various sliders implemented throughout the website.
 - Incorporated a form for generating client email submissions.

CineEquip

Currently (still being worked on)

- Full-stack application using **MERN (MongoDB, Express.js, React.js, Node.js, TypeScript)**
 - Used Multer middleware for backend Image storage.
 - Established a backend structure following the MVC pattern.
 - Integrated Zustand state library to allow for better usage of global state.
 - Implemented React Router for frontend routing.

Instacart landing page clone design challenge

<https://breath-of-the-wild-companion-app.pages.dev/>

- A instacart landing page focusing on Frontend functionality **(React, CSS3, TypeScript)**
 - Decided to create an accordion component from scratch, focusing on maintaining a pure and minimalistic design approach.
 - Resolved an issue regarding the footer section and the accordion component in desktop view. I had to use a custom hook (ex.useMediaQuery) and a brand new component to resolve the issue.

Breath of the wild Website -

<https://breath-of-the-wild-companion-app.pages.dev/>

- A Directory of game materials, creatures, and treasures. Using **(React, TypeScript, Tailwind)**
 - Built a search component that allows for searching and filtering content
 - Fetched Data from an existing public API.
 - Designed many custom hooks from scratch for better state reusability ex. (useDisableBodyScroll, useCustomQuery).

EXPERIENCE

JFC WOODWORKING / NY - Business Administrator

2023 - Present
